Friction. Kinetic friction acts on objects sliding against each other. Static friction acts on objects that are not sliding. The magnitude of the frictional force is determined by the nature of the surfaces in contact and the normal force acting on the object.

22.3 The Process of Breathing Anatomy and Physiology

Pulmonary ventilation is the process of breathing, which is driven by pressure differences between the lungs and the atmosphere. Atmospheric pressure is the force exerted by gases present in the atmosphere. The force exerted by gases within the alveoli is called intra-alveolar (intrapulmonary) pressure, whereas the force exerted by gases in the pleural cavity is called intrapleural pressure.
