Of primary concern to an investigator of neurological disorders is that of the selection of the most relevant animal model to achieve his or her research goals.

[Animal Models of Neurological Disorders - PubMed Central \(PMC\)](#)

Negative views of animal modeling of neurological diseases often stem from failures in the application of an animal model to pre-clinical testing of candidate treatment molecules. In the stroke field, roughly 500 neuroprotective therapies that were seen as successful in rodent models of stroke subsequently failed at some stage of translation to humans, with only 1 treatment emerging as a new, approved therapy [7 , 8].
