Psychology Of Anger - MentalHelp

Introduction Anger is a natural and mostly automatic response to pain of one form or another (physical or emotional). Anger can occur when people don't feel well, feel rejected, feel threatened, or experience some loss.

Anger | Psychology Today

Anger Issues. Everyone experiences anger at some point in life. It becomes problematic, however, when the frequency or severity of anger interferes with relationships, work performance, legal

Anger and Aggression American Psychological Association

Anger is an emotion characterized by antagonism toward someone or something. It can give you a way to express negative feelings or motivate you to find solutions, but excessive anger can harm your physical and mental health.

Anger - Wikipedia

Anger or wrath is an intense expression of emotion. It involves a strong, uncomfortable and hostile response to a perceived provocation, hurt or threat. Anger can occur when a person feels their personal boundaries are being or are about to be violated.

Psychology Tools: What is Anger? A Secondary Emotion ...

This post explains how anger is a secondary emotion. By understanding the roots of anger that is, the primary emotions fueling it people can more effectively address its underlying causes.
