Behavioral science refers to the scientific study of behavior, which makes behavioral economics a kind of behavioral science. Psychology and economics is also a broader category, referring to

**An Introduction to Behavioral Economics**

Along with behavioral decision theory, behavioral game theory is the second major theoretical area found in behavioral economics. Typically, these games endow participants with rewards (e.g. tokens), which then change hands based on choices made by individuals within the rules of the game. This occurs over the course of one or more rounds of playing. The outcome of the game is evident in the
