Biodiversity Global Issues

The variety of life on Earth, its biological diversity is commonly referred to as biodiversity. The number of species of plants, animals, and microorganisms, the enormous diversity of genes in these species, the different ecosystems on the planet, such as deserts, rainforests and coral reefs are all part of a biologically diverse Earth. [Home \[www.biodiversitybc.org\]](#)

BC is Special. Compared to much of the world, B.C. continues to enjoy an abundance of natural diversity. The variety and richness of our landscapes, ecosystems and species - that is our biodiversity - produce a wide range of ecological "goods and services" such as clean air and water, food, medicine, productive soils, fibre, regulation of local

Biodiversity Heritage Library

The Biodiversity Heritage Library works collaboratively to make biodiversity literature openly available to the world as part of a global biodiversity community.

ActionBioscience - promoting bioscience literacy

Compared to other threats to biodiversity, invasive introduced species rank second only to habitat destruction, such as forest clearing. Of all 1,880 imperiled species in the United States, 49% are endangered because of introduced species alone or because of their impact combined with other forces.
