[Data Communications For Engineers - Springer](#)
of data communications, as the term is used by computer scientists. This has, of necessity, involved a number of compromises. A great deal of the mathematical aspects of communications theory has had to be omitted, but this may be no bad thing as the principles can be appreciated without having to wade through acres of integrals! On the other hand, the details of programming for data [Data Communications Jobs in Brampton, ON \(with Salaries ...](#)

Data Communications (DC) - Techopedia.com

Data communications (DC) is the process of using computing and communication technologies to transfer data from one place to another, and vice versa. It enables the movement of electronic or digital data between two or more nodes, regardless of geographical location, technological medium or data contents.

Basics of Data Communication and Computer Networking (262 KB)

Data communication is the active process of transporting data from one point to another. Networks are communication system designed to convey information from a point of origin to a point of destination. Note that they are communication system, not computer system. The operative word is communication, the transfer of information from one device to another. Networks come in two flavors
