"Using Big Data for Analytics and Decision Support" by ...

More descriptive terms like unstructured data, process data and machine data are more useful for IT professionals. Researchers need to study and document use cases that explain how specific, novel data, so-called Big Data, can be used to support decision-making.

Using Big Data for Analytics and Decision Support
Power Using Big Data for Analytics and Decision Support
Proceedings of the Eighth Midwest Association for Information Systems Conference, Normal, Illinois May 24-25, 2013 3 2) Predictive data analyses using simulation models to generate scenarios based on historical data to understand the future.

How are the decision support systems different from big data?

While DSS has been traditional and was successful with data which is relatively less huge, less varied, structured than Big data, it is not possible to use same technologies for the data which is highly varied (from text to multimedia), hugely complex, huge (from GB to PB), and very importantly unstructured.
