There is also a large literature on the impact of witnessing

domestic violence as a child and child developmental outcomes, 5-7 and the impact of maternal depression on child development, 19 but no study has previously investigated the relationship between antenatal violence and subsequent adverse impact on child development. Our study confirms this association and finds that it is at least

...

Mothers are at risk of domestic violence (DV) and its harmful consequences postpartum. There is no evidence to date for sustainability of DV screening in primary care settings. We aimed to test whether a theory-informed, maternal and child health (MCH) nurse-designed model increased and sustained DV
