Field-Scale Water and Solute Flux in Soils | Roth | Springer

The workshop was designed to survey the current understanding of water and solute transport through unsaturated soils under field conditions, and to foster research by discussing some unresolved key issues relative to transport modeling and experimentation in four "Think Tank" groups. The first part of this book consists of the reports prepared by the Think Tank groups, who discussed the following topics: modeling approaches, effective large scale properties, evaluation of field properties (Field-scale water and solute flux in soils)

More recently, in 1989, a workshop was held on Monte Verit, Switzerland, to discuss field-scale water and solute flux in soils (Roth et al., 1990). One of the four Think-Tanks held at that
