A. Aerosol Aerosols are minute particles, such as mist, fog or smoke, suspended in the atmosphere. Aftershock

Carboniferous - Wikipedia

The Carboniferous is a geologic period and system that spans 60 million years from the end of the Devonian Period 358.9 million years ago , to the beginning of the Permian Period, 298.9 Mya.

Depositional Environments - SEPM Strata

The complete sequence of depositional environments from mountain to ocean basin is what we call a "long system".

The sediments at the beginning of long systems are chemically and mechanically unstable in composition, and are generally poorly sorted, immature gravels.

Glossary - PBS: Public Broadcasting Service

acquired trait: A phenotypic characteristic, acquired during growth and development, that is not genetically based and therefore cannot be passed on to the next generation (for example, the large

Chalk - Geologyshop

Recently in the UK, Prof. Mortimore of Brighton University has reviewed the geological subdivisions of the UK Chalk. His new practical subdivision uses a combination of lithostratigraphy, biostratigraphy and chronostratigraphy and has replaced the older biostratigraphic subdivision of the Chalk used by the British

Prepared Slides - usedmicroscopes.co.uk

Botanical Set. This is a set of 25 slides of botanical material prepared by probably the last UK slide preparation company - ESP in Sussex. The material was designed to cover the various botanical classification features that apply to botany and includes primitive plant forms such as ferns and liverworts to the more complex structures such as

Jam-D

Noah's Prism, designed by Loop-pH, was a 650m temporary structure situated in North London, in the backyard of a house where Sigmund Freud lived for a short while in 1938.

Leopard Sharks, *Triakis semifasciata* ~ MarineBio.org
Description & Behavior. Leopard sharks, *Triakis semifasciata* (Girard, 1855), are members of the Houndsharks Family, *Triakidae*. Zebra sharks, *Stegostoma fasciatum*, are commonly confused with leopard sharks and share the same common name in Australia and SE Asia.

Ocean Acidification | Smithsonian Ocean

Ocean acidification is sometimes called climate change's equally evil twin, and for good reason: it's a significant and harmful consequence of excess carbon dioxide in the atmosphere that we don't see or feel because its effects are happening underwater. At least one-quarter of the carbon
