hemoglobin, weight and final hemoglobin.

NATRIEMIE CORRIGEE (GLYCEMIE)

Dans le plasma le glucose est osmotiquement actif, une augmentation de la glycémie entraîne donc un appel d'eau du secteur intra-cellulaire vers le secteur extra-cellulaire, ceci a pour effet une hémodilution entraînant une diminution de la natrémie mesurée, c'est donc une fausse hyponatrémie.

Intravascular volume status - Wikipedia

In medicine, intravascular volume status refers to the volume of blood in a patient's circulatory system, and is essentially the blood plasma component of the overall volume status of the body, which otherwise includes both intracellular fluid and extracellular fluid.
