Landscape Ethiopia - Shoestring

Landscape Ethiopia. Land and landscape The Ethiopian landscape is largely formed from a high volcanic plateau. It is surrounded on three sides by low-lying desert. The average height of the plateau (the Ethiopian highlands) is over 2000 meters. Moreover, there are more than 20 mountains over 4000 meters. The Ethiopian highlands are bisected by the Rift (Rift Valley). This begins at the Red Sea

What is the difference between landform and landscape? - Quora

Landscape comprises the visible features of an area of land, including the physical elements of landforms such as mountains, hills, water bodies such as rivers, lakes, ponds and the sea, living elements of land cover including indigenous vegetation, human elements including different forms of land use, buildings and structures, and transitory elements such as lighting and weather conditions.

Landscape - Wikipedia

A landscape is the visible features of an area of land, its landforms, and how they integrate with natural or man-made features. A landscape includes the physical elements of geophysically defined landforms such as (ice-capped) mountains, hills, water bodies such as rivers, lakes, ponds and the sea, living elements of land cover including
