[Life extension - Wikipedia](#)

Life extension is the idea of extending the human lifespan, either modestly through improvements in medicine or dramatically by increasing the maximum lifespan beyond its generally settled [clarification needed] limit of 125 years. The ability to achieve such dramatic changes, however, does not currently exist.

[Life Expectancy Calculator | Sun Life Financial](#)

The life expectancy is calculated by adjusting remaining life expectancy directly and not mortality rates at each age. The factors are calculated from differences in life expectancies at birth. The calculator is assuming that the same % reduction/gain to life expectancy at birth will be applied to remaining life expectancy regardless of current age.

[List of countries by life expectancy - Wikipedia](#)

Methodology: Life expectancy equals the average number of years a person born in a given country is expected to live if mortality rates at each age were to remain steady in the future.
