**16 Early Symptoms of Multiple Sclerosis - Healthline**  
Multiple sclerosis (MS) is a progressive, immune-mediated disorder. That means the system designed to keep your body healthy mistakenly attacks parts of your body that are vital to everyday function.

**Symptoms MS Society of Canada**

MS fatigue can be one of the most disabling symptoms of MS; up to 90% of people with MS experience fatigue. Fatigue can be a primary symptom (due to active inflammatory disease) or a secondary symptom (the result of other symptoms or conditions such as sleep disorders, depression, or muscle weakness).

**20 Multiple Sclerosis (MS) Symptoms, Signs, Treatment ...**

Multiple sclerosis is an autoimmune disease in which the immune system attacks myelinated axons in the brain and spinal cord nerve fibers (central nervous system), damaging or destroying the myelin (demyelination) and/or the axons (nerve tissue).

**Multiple Sclerosis (MS) Symptoms & Early Warning Signs of MS**

People with multiple sclerosis (MS) tend to have their first symptoms between the ages of 20 and 40. Usually the symptoms get better, but then they come back. Some come and go, while others linger.

**Multiple Sclerosis (MS) Symptoms and Treatment - OnHealth**

Multiple sclerosis (MS) is an autoimmune disorder where the immune system mistakenly perceives its own myelin (the sheath around the nerves) as an intruder and attacks it, as it would a virus or other foreign infectious agent.

**Could You Have MS? 16 Multiple Sclerosis Symptoms - Health**

Multiple sclerosis (MS) is a disease of the central nervous system, meaning it affects the brain and spinal cord. In the most common type (known as relapsing remitting MS), symptoms come and go.

**5 Early Multiple Sclerosis (MS) Symptoms - Treatment ...**

Multiple sclerosis is a condition that results from damage to myelin, the tissues surrounding nerves of the brain and spinal cord. Damage to the myelin is a result of an autoimmune disease in which the body produces an immune response against its own tissues.

**8 Common MS Symptoms in Women - Healthline**

Multiple sclerosis (MS) is considered an autoimmune condition that affects the brain and spinal cord of the central nervous system. The disease affects women more

often than men.

### **How to Spot the Signs of an MS Flare - Everyday Health**

More than two-thirds of the approximately 400,000 people with multiple sclerosis (MS) in the United States have relapsing-remitting MS, which means they have periods when their symptoms are severe.

### **Is It Rheumatoid Arthritis? The Differences Between RA and OA**

RA is an autoimmune disorder, which means your body attacks itself. If you have RA, your body interprets the soft lining around your joints as a threat, similar to a virus or bacteria, and attacks it.
