New reproductive technology has provided the solution for problems of infertility for hundreds of thousands of couples. For halakhically observant Jews, especially in the pro-natal state of Israel, and in general in the post-Holocaust era, new reproductive technology has been a blessing but has also created a multitude of halakhic problems.

Reproductive technology - Wikipedia

In the 20th century, Aldous Huxley's Brave New World (1932) was the first major fictional work to anticipate the possible social consequences of reproductive technology.

Its largely negative view was reversed when the author revisited the same themes in his utopian final novel, *Island* (1962).

Assisted Reproductive Technology | IVF | MedlinePlus
Assisted reproductive technology (ART) is used to treat infertility. It includes fertility treatments that handle both a woman's egg and a man's sperm. It works by removing eggs from a woman's body. The eggs are then mixed with sperm to make embryos. The embryos are then put back in the woman's body. In vitro fertilization (IVF) is the most common and effective type of ART. ART procedures
