Nonlinear quantum equations: Classical field theory ...

An exact classical field theory for nonlinear quantum equations is presented herein. It has been applied recently to a nonlinear Schr dinger equation, and it is shown herein to hold also for a nonlinear generalization of the Klein-Gordon equation. These generalizations were carried by introducing nonlinear terms, characterized by exponents depending on an index q , in such a way that the standard, linear equations, are recovered in the limit $q \rightarrow 1$. The main characteristic of this field
