PARLE '91, Parallel Architectures and Languages Europe ...

The biannual Parallel Architectures and Languages Europe (PARLE) conferences aim at presenting current research on all aspects of the theory, design and application of parallel computing systems and parallel processing.

PARLE '91, the third conference in the series, again offers a wealth of high-quality research material for the benefit of the scientific community. Compared to its predecessors

Course Catalogue - Parallel Programming Languages and ...

The module familiarises students with the issues involved in designing, implementing and applying parallel programming systems. Initial motivation will be provided by consideration of a number of typical high performance applications and parallel architectures. This will highlight the role of parallel software systems as a means of bridging the gap between these and allow abstraction of the

[Parallel Thread Execution - Wikipedia](#)

Parallel Thread Execution (PTX, or NVPTX) is a pseudo-assembly language used in Nvidia's CUDA programming environment. The nvcc compiler translates code written in CUDA, a C++-like language, into PTX, and the graphics driver contains a compiler which translates the PTX into a binary code which can be run on the processing cores.
