[Pellet fuel - Wikipedia](#)

Pellet fuels (or pellets) are biofuels made from compressed organic matter or biomass. Pellets can be made from any one of five general categories of biomass: industrial waste and co-products, food waste, agricultural residues, energy crops, and virgin lumber. Wood pellets are the most common type of pellet fuel and are generally made from [Pellet Power | Wood Pellet Association of Canada](#) Canada should follow Europe's lead and co-fire wood pellets in its coal-fired power plants. The move would use a readily-available and sustainable resource to meet demands to reduce emissions and move away from fossil fuels.
