Ross Sea Ecosystem - The Last Ocean

The Ross Sea ecosystem is the last intact marine ecosystem left on Earth. Unlike many other areas of the world's oceans, the Ross Sea's top predators are still abundant. Here they drive the system, shaping the food web below in a way that's totally unique [1]. While comprising just two percent of

Ross Sea Ecology | SpringerLink - link.springer.com

The Antarctic represents the last of the world's still unexplored continents. Since 1985, Italy has sent 10 expeditions to this region, three of those have been exclusively devoted to research on the marine ecology of the Ross Sea region.

Ross Sea party - Wikipedia

The Ross Sea party was a component of Sir Ernest Shackleton's Imperial Trans-Antarctic Expedition 1914-17. Its task was to lay a series of supply depots across the Great Ice Barrier from the Ross Sea to the Beardmore Glacier, along the polar route established by earlier Antarctic expeditions.

Ross Sea Preservation - asoc.org

The Ross Sea has incredible biological diversity and a long history of human exploration and scientific research. Marine life is as abundant now as it was thousands of years ago, and a recent scientific study (Halpern et al. 2008) determined that the region has the lowest level of disturbance from human activities among the world's oceans. It is important that it be protected from activities
