[How scheduling works in Project - support.office.com](#) Automatic scheduling provides a highly structured, systematic means of managing project schedules. Based on users input, such as task duration, planned work, number of resources, and constraint dates, Project calculates the earliest and latest dates for tasks for the optimal schedule. [Manual vs. Auto-Scheduling in Microsoft Project | OnePager ...](#)

Manual vs. Auto-Scheduling in Microsoft Project Posted on January 2, 2015 by Jay Leslie Many of our users ask us about the two different types of scheduling modes available in Microsoft Project; Manual and Automatic, and what will work best for them.

### Manual Schedule Versus Automatic Schedule in Project 2013

**Auto Schedule:** Project calculates task schedules for you based on the project start date and finish date, task dependencies, calendar selections, and resource scheduling. **Manually:** Project enables you to skip entering the duration and dates, and specifying them later. When you enter the duration and dates, Project fixes the schedule for the task and doesn't move it unless you do so manually. **News, Tips, and Advice for Technology Professionals ...** With manual scheduling, the intent is to conduct a rough-order magnitude of planning and then switch to automatic scheduling when specific task details are known. My plan and advice

### Manually Scheduled vs Auto Scheduled Part One Project ...

To change this, Click File, In the Options pane, clicking on the Schedule button, towards the bottom, the scheduling options for this project > New Tasks Created will provide the selection between Auto Scheduled and Manually Scheduled.
