By Andrew Zimmerman Jones, Daniel Robbins . In 1905, Albert Einstein published the theory of special relativity, which explains how to interpret motion between different inertial frames of reference that is, places that are moving at constant speeds relative to each other.

[Relativistic Time Exactly What Is Time?](#)

The idea of relativistic time is a direct result of Albert Einstein's Theory of Relativity. THE SPECIAL THEORY OF RELATIVITY

These principles, and their consequences constitute the Special Theory of Relativity. Later, Einstein was able to further develop this theory, leading to what is known as the General Theory of Relativity. Amongst other things, this latter theory is essentially a theory of gravitation. The General Theory will not be dealt with in this course.
