Temperament - Wikipedia

In psychology, temperament broadly refers to consistent individual differences in behavior that are biologically based and are relatively independent of learning, system of values and attitudes.

Temperament | Definition of Temperament by Merriam-Webster

Why is temperament spelled the way it is? Blame Latin. Like the related noun temper (which most often refers to a person's tendency to become angry, but also has a neutral sense very close to that of temperament, among other meanings) temperament traces back to a Latin word, temperare, which means "to mix or blend."

While a mood can change, your temperament is your overall tone most of the time. Just like dogs, people have temperaments: some are aggressive; some are playful; and some are just happy to carry your slippers.

Temperament dictionary definition | temperament defined

Temperament is the way you tend to behave or the types of emotions you tend to exhibit.

Four Temperaments Test

This is an interactive version of the Open Four Temperaments Scales. Introduction: The idea of the four temperaments traces back to the Ancient Greek medical theory of the four humours, which held that there were four fundamental bodily humours (blood, yellow bile, black bile, and phlegm) and that illness was caused by an imbalance in these.

Four Temperaments: Sanguine, Phlegmatic, Choleric, and ...

Because this temperament is prone to pleasure-seeking behaviors, many people with sanguine personality are likely to struggle with addictions. Their constant cravings may lead to overeating and weight problems.
