Dioxygen Activation And Homogeneous Catalytic Oxidation

Dioxygen activation is a rapidly developing field in which research is directed at (1) modelling of biological oxidations, (2) design and utilization of new catalysts for oxidative transformations of organic substrates, (3) application of O₂ (and H₂O₂) as a cheap oxidant in the manufacture of fine and bulk chemicals.

The Activation of Dioxygen and Homogeneous Catalytic Oxidation

The activation of dioxygen in the coordination sphere of transition-metal centers is equally important for chemistry and biology and has been known for a long time for Fe-, Co- and Cu-containing.
