[Alpha-1 adrenergic receptor - Wikipedia](#)
The alpha-1 (α_1) adrenergic receptor is a G protein-coupled receptor (GPCR) associated with the G q heterotrimeric G-protein. It consists of three highly homologous subtypes, including 1A-, 1B-, and 1D-adrenergic.

[Alpha-1A adrenergic receptor - Wikipedia](#)

The alpha-1A adrenergic receptor (α_{1A} adrenoreceptor), also known as ADRA1A, formerly known also as the alpha-1C adrenergic receptor, is an alpha-1 adrenergic receptor, and also denotes the human gene encoding it. There is no longer a subtype 1C receptor.

D.B. Bylund, in Encyclopedia of Neuroscience, 2009.

Adrenergic Receptor Signal Transduction Pathways. The alpha-1 adrenergic receptors activate the G q/11 family of G-proteins, leading to the dissociation of the α and $\beta\gamma$ subunits and the subsequent stimulation of the enzyme phospholipase C.

These results indicate that A-61603 is a potent adrenergic agonist, selective for alpha-1A/a receptors, and may prove a useful probe for studies of adrenergic function and alpha-1 adrenoceptor regulation of physiological functions.

PLOS ONE: The Alpha-1A Adrenergic Receptor in the Rabbit Heart

The alpha-1A-adrenergic receptor (AR) subtype is associated with cardioprotective signaling in the mouse and human heart. The rabbit is useful for cardiac disease modeling, but data on the alpha-1A in the rabbit heart are limited. Our objective was to test for expression and function of the alpha-1A

Alpha-1 blocker - ipfs.io

Alpha-1 blockers (also called alpha-adrenergic blocking agents) constitute a variety of drugs that block 1-adrenergic receptors in arteries, smooth muscles, and central nervous system tissues.

Alpha 1-Adrenergic Blockers | definition of Alpha 1 ...

Alpha 1-adrenergic blockers are drugs that work by blocking the alpha 1-receptors of vascular smooth muscle, thus preventing the uptake of catecholamines by the smooth muscle cells. This causes vasodilation and allows blood to flow more easily. These drugs, called alpha blockers for short, are used
