Logical empiricists created a scientifically and technically informed philosophy of science, established mathematical logic as a topic in and tool for philosophy, and initiated the project of formal semantics. Accounts of analytic philosophy written in the middle of the twentieth century gave logical empiricism a central place in the project. The second wave of interpretative accounts was constructed to show how philosophy should progress, or had progressed, beyond logical empiricism. The Origins of Logical Empiricism (U Minnesota P, 1996)
Research Interests I work mainly in the history of

philosophy of science in the early twentieth century; I am particularly concerned to understand the place of philosophy of science in the analytic philosophy over the course of the twentieth century.
