## Thyroidectomy - Wikipedia

A thyroidectomy is an operation that involves the surgical removal of all or part of the thyroid gland. General, Endocrine or Head and Neck Surgeons often perform a thyroidectomy when a patient has thyroid cancer or some other condition of the thyroid gland (such as hyperthyroidism) or goiter.

Surgery | ThyCa: Thyroid Cancer Survivors' Association, Inc.

Surgery Contents of This Page Surgery for Differentiated Thyroid Cancer (Papillary and Follicular) After Surgery Possible Risks Recovery from Surgery

## General Surgery - Thyroidectomy

The thyroid gland is a butterfly-shaped organ composed of two cone-like lobes or wings connected via the isthmus.

The gland regulates metabolism by secreting hormones.

## Endocrine Surgery - Thyroidectomy

The thyroid gland is a butterfly-shaped organ composed of two cone-like lobes or wings connected via the isthmus.

The gland regulates metabolism by secreting hormones.

Life Without a Thyroid | Positive post thyroidectomy stories

The following story is from Steven who had a thyroidectomy as a result of papillary carcinoma. He had his thyroidectomy a week prior to this story, so he has a journey in front of him.
