Water Management in oil sands | Natural Resources Canada

Water Management in oil sands Recovering bitumen from oil sands is currently done in 2 different ways both requiring water. If the oil sand is not too deep in the ground it is dug out (oil sand mining), then mixed with water, after which the bitumen is recovered as a froth from the surface of the oil sand-water mixture.

Water Management

Aboriginal Affairs and Northern Development Canada (AANDC) has, as one of its functions in the north, the mandate to manage water resources in the Northwest Territories and Nunavut. On April 1, 2003, responsibility for the management of water resources in Yukon was transferred to the Government of the Yukon.

Water - Province of British Columbia

A water right is the authorized use of surface water or groundwater under a water licence or approval. There are

authorized uses of water outside of licensing, for example the use of unrecorded water, or the use of groundwater for domestic purposes.
